

PUNITH B CHANDAKAVATE

PYTHON BACKEND DEVELOPER

PYTHON | CLOUD DATA ENGINEERING | AWS | AZURE | PYSPARK

puneetchandakawathe@gmail.com | 7353403383 | Bangalore | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Python Backend Developer with 3+ years of professional experience designing scalable backend applications, REST APIs, and enterprise software solutions. Hands-on experience building cloud-based ETL pipelines through personal Data Engineering projects using Azure Databricks, PySpark, Delta Lake, ADLS Gen2, Amazon S3, AWS Lambda, AWS Glue, and Amazon Redshift. Strong foundation in SQL, data modeling, and cloud technologies, while continuously expanding expertise in modern Data Engineering and cloud analytics platforms.

TECHNICAL SKILLS

Programming & Backend:

Python • Django • Django REST Framework • FastAPI • REST APIs

Data Engineering:

SQL • PySpark • Apache Spark • ETL/ELT • Delta Lake • Data Modeling

Cloud:

Azure Databricks • ADLS Gen2 • Unity Catalog • Amazon S3 • AWS Lambda • AWS Glue • Amazon Redshift

Databases:

PostgreSQL • MySQL • SQL Server

Tools:

Git • GitHub • GitLab • Docker • Linux • Celery • Redis • Postman • VS Code

EXPERIENCE

Python Developer | ZKTeco India – Global R&D Center, Bengaluru

Oct 2022 – Present

- Led backend architecture and modernization of enterprise attendance/workforce management systems using Python, Django, and Django REST Framework, with a focus on performance, scalability, and reliability.
- Designed and implemented robust RESTful API technologies for the real-time connection, integration, and processing of various biometric devices.
- Optimized report engines, database query systems, and business logic to improve the accuracy of application analytical results, processing speed, and overall application efficiency.
- Implemented multi-database architecture allowing for scalability in PostgreSQL, MySQL, SQL Server, and Oracle environments.
- Improved application security through resolution of vulnerabilities, updating of legacy applications, and ensuring data integrity, including GDPR requirements.
- Modernized dashboards and UI workflows to enhance the user experience, navigation flow, and system responsiveness.
- Introduced automated update mechanisms to improve deployment stability and maintainability.
- Mentored developers and conducted code reviews while working with various cross-functional teams within an Agile development methodology to ensure production-ready software release.

FEATURED DATA ENGINEERING PROJECTS

ShopVista Data Modernization Platform | [GitHub](#)

Azure Databricks | PySpark | Delta Lake | ADLS Gen2 | Unity Catalog | Power BI

- Designed an end-to-end Azure Lakehouse using the Medallion Architecture (Bronze, Silver, Gold).
- Developed Bronze, Silver, and Gold ETL pipelines using PySpark and Delta Lake.
- Implemented Auto Loader and Structured Streaming for incremental ingestion.
- Built Star Schema dimensional models for analytics.
- Automated workflows using Databricks Workflows.
- Created interactive Power BI dashboards.

CarePlus Data Ingestion & Analytics Pipeline | [GitHub](#)

Amazon S3 | AWS Lambda | AWS Glue | Amazon Redshift | Power BI | FastAPI

- Built an event-driven serverless ETL pipeline using AWS services.
- Automated ingestion with Amazon S3 event triggers.
- Developed AWS Lambda functions and AWS Glue ETL jobs.
- Loaded analytics-ready datasets into Amazon Redshift.
- Built Power BI and FastAPI dashboards.

PROFESSIONAL PROJECTS

BiotimeCloud 2.0 – Enterprise Workforce Management Platform Jan 2024 – Present

- Redesigned enterprise dashboards, enhancing usability, consistency, and user experience.
- Developed RESTful APIs for global biometric device integration and centralized attendance data processing.
- Optimized backend services and SQL queries to improve reporting performance and system responsiveness.
- Built secure biometric data management features with mobile API integration and global user registration support.

Intelligent-time – Enterprise Attendance & Productivity Platform Jan 2024 – Present

- Built a time management and productivity tracking system, improving workforce efficiency and operational visibility.
- Optimized backend modules, SQL queries, and data processing workflows, enhancing application performance and reducing report generation time.
- Improved application architecture and resolved security vulnerabilities, strengthening system reliability, scalability, and user experience.

Enterprise Time & Productivity Management Platform Oct 2022 – Jan 2024

- Designed scalable backend components and REST APIs for offline attendance management.
- Developed new features and optimized application performance through Agile collaboration.
- Improved security and maintainability by upgrading legacy backend libraries.
- Enabled multi-database support across PostgreSQL, MySQL, SQL Server, and Oracle.

EDUCATION

Bachelor of Engineering (B.E.) in Electrical and Electronics Engineering 2016 – 2020

BLDEA's V.P. Dr.P.G.Halakatti College of Engineering & Technology Vijayapur
