

PUNITH B CHANDAKAVATE

PYTHON DEVELOPER

puneetchandakawathe@gmail.com | 7353403383 | Bangalore | [LinkedIn Profile](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Django developer with over three years of Python and Django experience in designing, developing, and maintaining scalable web applications. Strong background in database optimization, application security, backend architecture, and RESTful API development with the Django REST Framework. Knowledgeable on modernizing user interfaces, performance optimization, and integration of several databases: PostgreSQL, MySQL, and SQL Server. Proven delivery of high-performing, safe enterprise solutions in Agile settings. Skilled in code reviews, mentorship of developers, and collaboration with cross-functional groups to deliver production-ready software.

TECHNICAL SKILLS

Python (3+ years)

Django

FastAPI

RESTful APIs

SQL (PostgreSQL, SQL Server)

Git, GitHub, GitLab

unittest

HTML

CSS

JavaScript (Basics)

Linux (Basics)

Django Rest Framework (DRF)

Postman

Windows

Visual Studio Code (VSCode)

PyCharm

EXPERIENCE

Python Developer | ZKTeco India - Global R&D Center, Bengaluru

Oct 2022 - Present

- Led backend architecture and modernization of enterprise attendance/workforce management systems using Python, Django, and Django REST Framework, with a focus on performance, scalability, and reliability.
- Designed and implemented robust RESTful API technologies for the real-time connection, integration, and processing of various biometric devices.
- Optimized report engines, database query systems, and business logic to improve the accuracy of application analytical results, processing speed, and overall application efficiency.
- Implemented multi-database architecture allowing for scalability in PostgreSQL, MySQL, SQL Server, and Oracle environments.
- Improved application security through resolution of vulnerabilities, updating of legacy applications, and ensuring data integrity, including GDPR requirements.
- Modernized dashboards and UI workflows to enhance the user experience, navigation flow, and system responsiveness.
- Introduced automated systems for the updation and deployed systems to enhance stability and maintainability.
- Mentored developers and conducted code reviews while working with various cross-functional teams within an Agile development methodology to ensure production-ready software release.

PROJECTS

BiotimeCloud 2.0 Attendance Tracker Platform - [Link](#)

Jan 2024 - Present

- Redesigned Admin, Employee, and Vendor dashboards using HTML, CSS, and JavaScript, improving usability and interface consistency.
- Developed real-time attendance monitoring and analytics dashboards to track workforce activity and operational incidents.
- Architected RESTful API services enabling global biometric device connectivity and centralized attendance data processing.
- Optimized backend services and database queries to accelerate report generation and improve system performance.
- Implemented international phone number validation with country codes to support global user registration.
- Built secure biometric data management modules ensuring data integrity and mobile access via REST APIs.

Intelligent-time Attendance Tracker Platform (India) - [Link](#)

Apr 2023 - Jan 2024

- Built a time management and productivity tracking system to monitor tasks and employee work efficiency.
- Engineered backend modules and optimized SQL queries to enhance application performance and scalability.
- Refactored data processing workflows to reduce report generation time and improve system responsiveness.
- Improved application architecture and navigation to streamline user workflows and module accessibility.
- Detected and resolved security vulnerabilities, strengthening system protection and data reliability.

EasyTimePro – Offline Attendance Tracker Platform (India) - [Link](#)

Oct 2022 - Jan 2024

- Designed scalable backend components to support offline attendance tracking and high user workloads.
- Developed and maintained Django REST APIs to enable seamless mobile application integration.
- Integrated new attendance management features through cross-team collaboration and agile development practices.
- Upgraded legacy backend libraries to latest stable versions, enhancing application security and stability.
- Implemented automated update mechanisms to simplify maintenance and reduce manual deployment efforts.
- Enabled multi-database compatibility (PostgreSQL, MySQL, SQL Server, Oracle) for flexible enterprise deployment.

EDUCATION

Bachelor of Engineering (B.E.) in Electrical and Electronics Engineering

2016 - 2020

BLDEA's V.P. Dr.P.G.Halakatti College of Engineering & Technology Vijayapur
